Subject: Support Senate Bill 13

Good Morning General Law Committee,

I am writing to show my support for Governor Lamont's Senate Bill 13.

I have been employed in this industry for 30 years and I am in agreement that additional relief from the hiring ratio must be put into place.

Connecticut wants to grow and HVAC students need jobs!!!!!! Many employers cannot hire them because they cannot fully comply with the current ratio guidelines in place.

Connecticut has an abundance of HVAC work around this state and certainly not enough quality, license holders to get the work done. The ratio problem is preventing companies from hiring necessary and needed workers to get projects done. Consequently, it prevents the company I am employed with from going after these projects thereby preventing company growth.

Our families, friends and neighbors need to be employed to make this State of Connecticut prosper.

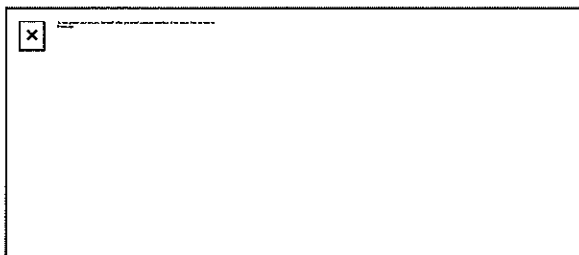

Please support Governor Lamont's Senate Bill 13.

Respectfully,

Debbie Turner
